DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Tuesday, 02 March 2021 at 05:36 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Light easterly winds and settled weather conditions will lead to pockets of Moderate air pollution building up across parts of England. The greatest risk will be across the far southeast. Much of the UK, however, will see air pollution persist at Low levels.

Tomorrow: Light winds, and low cloud and fog, will bring a chance of High air pollution in the southeast, with widespread Moderate levels across England and Wales. Otherwise Low levels expected.

Outlook: A change to clearer and colder conditions through Thursday will lead to widespread Low levels across the UK. These Low air pollution levels persisting Friday and Saturday.
